CHAPTER 11

Consolidated Index and Tables of Contents

(VOLUMES I-XVII, THE MAILING LIST)

In response to frequent calls from officers from all branches of the service, we are printing in this chapter an index and list of tables of contents of all volumes of The Mailing List published to date. This is the only complete index available. An examination of it will disclose material that has been carefully selected and that covers a wide range of subjects. Much of this material was written particularly for those officers faced with instructional problems. Some of it is available in no other form. Many of our subscribers, especially those of recent years, will find articles listed which will meet their needs and which could be readily used if the volumes in which these articles appear were at hand.

A complete file of all volumes of The Mailing List will provide clear, concise articles embodying the teachings of The Infantry School on nearly every subject pertaining to infantry officers. There are still available in The Book Shop of The Infantry School volumes of some past issues. These may be secured upon request at a cost of one dollar ($1.00) per volume. A great many officers have already completed their files of The Mailing List from this source. The demand is rapidly exhausting the supply of back issues. The list of tables of contents shows which volumes are still available.
